

Nuclear Testing

WHEREAS our government deems it wise to resume nuclear testing for the safety of mankind; and

WHEREAS our President has made repeated offers to put a ban on all nuclear preparation, provided a satisfactory method of inspection may be set up to guarantee the same rights and privileges for all;

THEREFORE BE IT RESOLVED that while we deplore further development of warlike equipment in this field, yet we would assure our President that we are favorable to every measure necessary to the security of the free world against the international gangsters who are trying to destroy freedom from the earth.
